## METHODOLOGY

The FTI Jan 2022 Resilience Barometer® incorporates the views of 3,314 decision makers in large companies across all G20 countries. Large companies are defined as those with over 250 employees, or over USD50million in annual global turnover, or with a balance sheet of over \$43million. From 26th October to 10th November 2021, FTI Consulting conducted a quantitative survey with respondent profiles replicating those used in the previous waves of Resilience Barometer® research. 78% of respondents were C-suite and senior managers/executives from privately owned companies, while 22% were from publicly listed companies.

Build **Resilience**. Protect **Value**. Deliver **Growth**.
